MARKET COMMENTARY

After registering losses for four consecutive sessions, Indian benchmark indices managed a modestly positive close on Tuesday, as investors accumulated quality stocks at attractive levels. Though, the session largely remained characterized by choppiness as the aimless indices moved only sideways in a tight band amid lack of triggers. Sentiments got some support after March-quarter earnings mostly meeting street's estimates despite a slowdown in global growth and tepid demand. Strength in European markets too aided sentiments. Some support came in with the report from private forecasting agency Skymet raising India's monsoon forecast to 109% of the long period average from 105% on the back of a waning El Nino. The agency also said that conditions are favorable for timely monsoon in Kerala. However, fears of an interest rate hike by the US Federal Reserve in June along with decline in crude oil prices and weakness in rupee capped the upside gains. For today's trade Nifty likely to trade in the range between 7765 – 7795 in the upper side and 7725 – 7705 in the lower side.
