## **NIFTY CHART**

## **MARKET COMMENTARY**

Thursday's session of trade was characterized by volatility, with benchmarks oscillating between green and red due to profit-booking by funds and retail investors amid weak global cues. Market sentiment was also influenced by investors treading cautiously ahead of June IIP and retail inflation data for July scheduled to be released on Friday. Indian equity benchmarks which traded mostly in red in early deals added some strength hovering near the highest point in late noon deals before paring entire gains and finally ended in green. For today's trade Nifty likely to trade in the range between 8615 – 8635 in the upper side and 8575 – 8565 in the lower side.
