MARKET COMMENTARY

Indian equity indices witnessed a blockbuster performance on the first day of the week by vehemently rallying over a percentage points and re-conquering their psychological levels. Except for some mild profit taking in early afternoon trades, Monday's session remained a day of recovery as key equity indices enthusiastically rallied through the day. Investors continued to build hefty positions across the board as sentiments got a boost with India's core sector output rising to 3.2% in August on the back of sharp rise in steel production and a pickup in cement, suggesting a lift in infrastructure and construction activity. Steel production rose 17% to a 37-month high, aided by the low base of last year. Adding the optimism among the market participants, credit rating agency Crisil expects India's gross domestic product (GDP) to grow at 7.9 per cent and agriculture to grow above trend at 4 per cent. The country's GDP will be supported by a boost from consumption especially in the hinterland after a well distributed monsoon this year. Some support also came with the report that foreign investors pumped in more than Rs 20,000 crore into the capital market in September, making it the highest net inflow in 11 months. For today's trade Nifty likely to trade in the range between 8745 – 8765 in the upper side and 8715 – 8695 in the lower side.
