NIFTY CHART

MARKET COMMENTARY

Indian benchmarks indices carried forward their northbound journey for yet another session on Thursday, ended slightly higher as investors awaited fresh triggers amid an uncertain global scenario. It turned out to be a rather volatile day of trade as the indices rebounded after drifting to lower levels in the morning session as sustained position build up was witnessed in several frontline stocks. Sentiments got some support with Minister for Road Transport and Shipping Nitin Gadkari's statement that it is the appropriate time to invest in India and added that the country is also working on ways to improve purchasing power of common men as that will present further opportunities. Further, market participants got some comfort with the private report indicating that strong domestic demand and cost competitiveness in exports will help Indian companies to overcome uncertainties from global geopolitical changes and domestic policymaking. For today's trade Nifty likely to trade in the range between 8445 – 8465 in the upper side and 8415 – 8395 in the lower side.
