NIFTY CHART

MARKET COMMENTARY

Indian equity benchmarks traded with traction and settled near intraday high levels with a gain of over half a percent on Thursday, with key gauges surpassing their crucial 28,300 (Sensex) and 8,750 (Nifty) levels. Traders took encouragement with report that India's exports continued to grow for the fifth straight month, expanding by 4.32 percent to \$ 22.11 billion in January against \$ 21.19 billion in the same month of 2016. Imports also rose, by 10.70 percent to \$ 31.95 billion, during the month under review. Some support also came after Fed Chair Janet Yellen, who in her second day of economic testimony before Congress, offered no additional insight on the timing of the central bank's next rate hike. For today's trade Nifty likely to trade in the range between 8815 – 8765.

NEWS & RUMOURS:

- Gold (Spot Dollar) major support \$1213/\$1175 & Resistance \$1267/\$1296.
- Crude oil range->\$47 to \$57.
 - Risk Rally Eases as U.S. Stocks Mixed, Bonds Climb: Markets Wrap: - The torrid advance in riskier assets eased, with U.S. equities little changed after the longest rally in three years and Treasuries rising for the first time in six days.
 - Dollar index still under pressure, hits 1-week lows: - The dollar was still on the downside against other major currencies on Thursday, trading at a oneweek low despite the release of mostly positive U.S. data and amid sustained expectations for a near-term U.S. rate hike.
 - Gold futures rally for 2nd day as dollar slides: - Gold prices added to overnight gains on Thursday, hitting a one-week high as the U.S. dollar's 11-day winning streak ran out of steam despite a brighter outlook for interest rate hikes.
 - ➤ U.S. natural gas sinks to 3-month lows after weekly storage data: - U.S. natural gas futures fell to a three-month low on Thursday, after data showed that natural gas supplies in storage in the U.S. fell less than expected last week.
 - ➢ Oil prices supported by OPEC cuts, but bloated inventories weigh: Oil prices were slightly higher on Thursday, supported by OPEC led supply cuts, but concerns over rising inventories and U.S. crude production weighed. To support the oversupplied global market, the Organization of the Petroleum Exporting Countries and other producers are cutting output by almost 1.8 million barrels per day in the first half of 2017. Although estimates suggest compliance by OPEC is around 90%, rising U.S. stocks and a revival of U.S. oil output have limited price gains.
