NEWS & RUMOURS:

- **Gold (Spot Dollar) major support = \$1240/\$1218 & Resistance = \$1301/\$1330.**
- **Crude oil range->\$43 to \$53.**
- **U.S. Stocks Hit Records, Pound Slides on U.K. Vote: Markets Wrap:** - U.S. stocks topped intraday records and the dollar rose, but the British pound tumbled as the U.K.'s ruling Conservative Party lost its parliamentary majority, plunging the country into uncertainty just days before Brexit negotiations were due to start. Crude rose following two days of losses, and gold fell.
- **Dollar stronger as sterling falls on election shock:** - The dollar rose to a 10-day high against a basket of currencies on Friday, boosted by a weaker British pound after Prime Minister Theresa May's Conservative Party lost its parliamentary majority in national elections.
- **After oil drop, some OPEC delegates question if supply cut deal enough:** - Two weeks after an OPEC-led deal to extend oil output cuts until March, some OPEC delegates are questioning whether the agreement will be enough to reduce a glut in supplies and lift prices. Prices have fallen more than 10 percent to below \$50 a barrel since the Organization of the Petroleum Exporting Countries and allies agreed on May 25 to prolong a deal to cut about 1.8 million barrels per day (bpd) until the end of March. The deal was initially due to run during the first half of 2017.
- **Gold prices slide lower on stronger dollar:** - Gold prices slid lower on Friday, as the dollar regained some ground after Thursday's three major risk events, although markets were still awaiting the final results of the U.K. election.
